"My nurse was so impressed at the ease with which she got my advance directives and medical history, she took down DocuBank's phone number so she could get one for her father."

The DocuBank Story

In 1993, DocuBank was founded by a couple who had seen too many frantic people hunt for documents and directives in emergencies. These two people asked themselves: wouldn't it be nice if there were a way to consolidate crucial medical information and store it in one easy, accessible place—so loved ones wouldn't have to search and guess at these stressful times?

DocuBank was born — the first national registry of its kind.

To date, DocuBank has enrolled over 350,000 members and partnered with thousands of estate planning professionals. It fulfills approximately 300 requests for documents each month. As always, DocuBank works to ensure that its members get the right care, in a timely manner, while surrounded by their strongest advocates.
